

## CTM: URINARY CYTOLOGICAL EXAMINATION

### COLLECTING INSTRUCTIONS:

Warning! Do not inhale or ingest and avoid contact with skin.

- Carry out the examination on the second urine of the morning according to the following directions:
- Wipe away the first urine of the morning
- Wash the genitalia carefully.
- Drink about a litre of water or other non-alcoholic and non-carbonated drink.
- After drinking, collect the second urine in a plastic container and pour it into the container provided by the Laboratory containing methanol and water.
- Close the container tightly.
- If more samples are required, repeat the above-mentioned steps for three consecutive days.
- Bring the sample to the Laboratory or in case of multiple samples bring them all on the third day.

**Do not keep the samples in the refrigerator.**
